NOTE 1: Product shown has a standard tolerance of $\pm 5\%$ on the nominal zener voltage. Also available in 2% and 1% tolerance with suffix C and D respectively. V_Z is measured at I_{ZT} with T_c (TAB 1) at 30°C.

NOTE 2: Zener impedance is derived by superimposing on I_{ZT} a 60 Hz rms ac current equal to 10% of I_{ZT} (25 μA ac.).

NOTE 3: Based upon 1 W maximum power dissipation. Allowance has been made for the higher voltage associated with operation at higher currents and temperature. For determination of voltage change with current deviations from I_{ZT} see Micro Note 202
