

MULTIPLE RS-232 DRIVERS AND RECEIVERS

AZ75232

General Description

The AZ75232 combines three drivers and five receivers, which conform to the EIA/TIA-232-F and ITU v.28 standards. Each receiver converts EIA/TIA-232-F inputs to 5-V TTL/CMOS levels and each driver converts TTL/CMOS input levels into EIA/TIA-232-F levels.

The flow-through pinout facilitates simple non-cross-over board layout. The AZ75232 provides a one-chip solution for the common 9-pin serial RS-232 interface between data terminal and data communications equipment.

The AZ75232 is available in SOIC-20, SSOP-20 and TSSOP-20 packages.
