

Threaded Cylindrical M18 Size Sensors with Built-in Amplifier

- Rugged stainless and nickel plated brass versions
- Chemical resistant, ABS resin case type
- Polarized models
- Compact and space-saving
- Long detection distance (7 m)
- DC switching types with connectors for easy maintenance
- Wide operating voltage range (10 to 30 VDC, or 24 to 240 VAC)
- Short-circuit and reverse connection protection (DC switching type)
- UL, CSA listed and CE marked

Through-beam (AC)

Emitter: Polyvinyl chloride-covered cord, 4-mm dia. (11/0.16), 2-conductor (brown and blue)
 Standard length: 2 m
 Receiver: Polyvinyl chloride-covered cord, 4-mm dia. (11/0.16), 3-conductor (brown, blue, and black)
 Standard length: 2 m

Diffuse and Retroreflective (AC)

Vinyl insulated round cord, 4-mm dia. (11/0.16), 3-conductor (brown, blue, and black)
 Standard length: 2 m

■ ACCESSORIES

E39-R1 Reflector (included with retroreflective units)

E39-L7 Reflector Adapter (order separately)

E39-R3 Reflector (order separately)

Mounting Bracket for E39-R3 (included with E39-R3)

E39-RSA Reflector**E39-RSB Reflector****E39-RU1 Right Angle Adapter****Mounting E39-RU1**

Do not exceed a torque value of 20 kg • cm (2.0 N • m, 17.4 in • lbs) when tightening the adapter onto the sensor.

Use a 1/16" (1.5 mm) hex key on the set screw to secure the adapter to the E3F2. Do not exceed a torque of 3.5 kg • cm (0.35 N • m, 3.0 in • lbs). When set properly, the set screw will still extend beyond the adapter wall. Make sure to loosen the set screw before removing the adapter from the sensor.

Y92E-B18 Mounting Bracket

Note: Hexagonal nut: M5 x 32
Material: plastic

E39-F31 Lens Cap

OPTIONAL CONNECTOR CABLES

**Straight Connector Cable
Y96E-44SD□**

**Right Angle Connector Cable
Y96E-44RD□**

22 AWG, PVC jacketed cable rated for 300 V, 90°C:
2 m (6.56 ft) length for Y96E-44SD2
5 m (16.40 ft) length for Y96E-44SD5
10 m (32.81 ft) length for Y96E-44SD10

22 AWG, PVC jacketed cable rated for 300 V, 90°C:
2 m (6.56 ft) length for Y96E-44RD2
5 m (16.40 ft) length for Y96E-44RD5
10 m (32.81 ft) length for Y96E-44RD10

Note: Cable may be extended to a maximum of 200 m (656 ft.)

Terminals/Connections

Assembly Directions

Insert the M12 threaded end of the sensor into socket of connector so that the notch correctly aligns the pins. Tighten the coupling nut by hand, not using a tool, until all the threads on the rear of the sensor are covered. This assures a positive connection, important for installations with vibration.

Note: Water tightness with connector is only valid when authorized connections are used. Cordset wire colors are shown in parentheses.

Precautions

If the input/output lines of the Photoelectric Sensor are placed in the same conduit or duct as power lines or high-voltage lines, the Photoelectric Sensor could be induced to malfunction, or even be damaged, by electrical noise. Separate the wiring, or use shielded lines as input/output lines to the Photoelectric Sensor.

Do not subject the Photoelectric Sensor to excessive shock when mounting, in keeping with IEC60529 IP66 standards.

Do not connect the black wire to the brown wire without a load. Direct connection of these wires may damage the Photoelectric Sensor (AC switching type).

WARNING

The E3F2 Photoelectric Sensor is not a safety component for ensuring the safety of people which is defined in EC Directive (91/368/EEC) and covered by separate European standards or by any other regulations or standards.

When using the Photoelectric Sensor in the vicinity of an inverter motor, be sure to connect the ground wire of the motor to earth. Failure to ground the motor may result in malfunction of the Sensor.

When using the Photoelectric Sensor at temperatures over 45°C, the load current must be within the rated value shown in the figure below.

■ MOUNTING

Do not exceed a torque of

- 2.0 N • m {20 kgf • cm} 17.7 in • lb when tightening mounting nuts for plastic models.
- 20.0 N • m {200 kgf • cm} 177 in • lb when tightening mounting nuts for metal models.

NOTE: DIMENSIONS SHOWN ARE IN MILLIMETERS. To convert millimeters to inches divide by 25.4.
