| KLNR | KLSR |
| LLNRK | LLSRK/LLSRK_ID |
| TLN | IDSR |

Class H fuse blocks are for use with Class $\mathrm{H} / \mathrm{K} 5$ fuses, which have an interrupting rating of up to 50,000 amperes. When higher interrupting ratings are required, use Class R fuses (200,000 A.I.R.) and Class R fuse blocks. Class R fuse blocks are dimensionally the same as Class H blocks, but incorporate a rejection feature which allows only Class $R$ fuses to be inserted.

## FEATURES/BENEFITS

Class H and Class R fuse blocks feature a one-piece fuse clip design for positive electrical contact and minimum heat rise. Side barriers provide isolation between poles. Bases on most blocks are of molded phenolic or thermoplastic, UL rated at $150^{\circ} \mathrm{C}$.

Class H 600V

| Amp Rating | No. of Poles | Catalog Number | Connector Type (Add suffix shown) |  |  | Maximum Wire Size |
