- 2-V to $5.5-\mathrm{V} \mathrm{V}_{\mathrm{CC}}$ Operation
- Max $\mathrm{t}_{\mathrm{pd}}$ of 8 ns at 5 V
- Typical $\mathrm{V}_{\text {OLP }}$ (Output Ground Bounce) $<0.8 \mathrm{~V}$ at $\mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}, \mathrm{~T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$
- Typical $\mathrm{V}_{\mathrm{OHV}}$ (Output $\mathrm{V}_{\mathrm{OH}}$ Undershoot) $>2.3 \mathrm{~V}$ at $\mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}, \mathrm{~T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$
- Support Mixed-Mode Voltage Operation on All Ports
- Latch-Up Performance Exceeds 250 mA Per JESD 17
- ESD Protection Exceeds JESD 22
- 2000-V Human-Body Model (A114-A)
- 200-V Machine Model (A115-A)
- 1000-V Charged-Device Model (C101)

## description/ordering information

The 'LV86A devices are quadruple 2-input exclusive-OR gates designed for $2-\mathrm{V}$ to $5.5-\mathrm{V} \mathrm{V}_{\mathrm{CC}}$ operation.
These devices contain four independent 2-input exclusive-OR gates. They perform the Boolean function
$Y=A \oplus B$ or $Y=\bar{A} B+A \bar{B}$ in positive logic.
A common application is as a true/complement element. If one of the inputs is low, the other input is reproduced in true form at the output. If one of the inputs is high, the signal on the other input is reproduced inverted at the output.

## exclusive-OR logic

An exclusive-OR gate has many applications, some of which can be represented better by alternative logic symbols.

Exclusive OR

These are five equivalent exclusive-OR symbols valid for an 'LV86A gate in positive logic; negation can be shown at any two ports.

## Logic-Identity Element

The output is active (low) if all inputs stand at the same logic level (i.e., $A=B$ ).

Even-Parity Element

The output is active (low) if an even number of inputs (i.e., 0 or 2 ) are active.

Odd-Parity Element

The output is active (high) if an odd number of inputs (i.e., only 1 of the 2 ) are active.

## absolute maximum ratings over operating free-air temperature range (unless otherwise noted) $\dagger$

$\qquad$
Input voltage range, $\mathrm{V}_{\mathrm{I}}$ (see Note 1) ............................................................ -0.5 V to 7 V

Voltage range applied to any output in the high-impedance
or power-off state, $\mathrm{V}_{\mathrm{O}}$ (see Note 1)
-0.5 V to 7 V

Package thermal impedance, $\theta_{\mathrm{JA}}$ (see Note 3): D package . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $86^{\circ} \mathrm{C} / \mathrm{W}$
DB package ........................................ $96^{\circ} \mathrm{C} / \mathrm{W}$
DGV package ....................................... $127^{\circ} \mathrm{C} / \mathrm{W}$
NS package ....................................... $76^{\circ} \mathrm{C} / \mathrm{W}$
PW package ...................................... $113^{\circ} \mathrm{C} / \mathrm{W}$

$\dagger$ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
NOTES: 1. The input and output negative-voltage ratings may be exceeded if the input and output current ratings are observed.
2. This value is limited to 5.5 V maximum.
3. The package thermal impedance is calculated in accordance with JESD 51-7.
recommended operating conditions (see Note 4)

## PARAMETER MEASUREMENT INFORMATION

LOAD CIRCUIT FOR TOTEM-POLE OUTPUTS

NOTES: A. $C_{L}$ includes probe and jig capacitance.
B. Waveform 1 is for an output with internal conditions such that the output is low, except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
C. All input pulses are supplied by generators having the following characteristics: $\mathrm{PRR} \leq 1 \mathrm{MHz}, \mathrm{Z}_{\mathrm{O}}=50 \Omega, \mathrm{t}_{\mathrm{r}} \leq 3 \mathrm{~ns}, \mathrm{t}_{\mathrm{f}} \leq 3 \mathrm{~ns}$.
D. The outputs are measured one at a time, with one input transition per measurement.
E. $t_{P L Z}$ and $t_{P H Z}$ are the same as $t_{\text {dis }}$.
F. $\mathrm{tPZL}^{\text {and }} \mathrm{tPZH}$ are the same as ten.
G. ${ }^{t} P H L$ and tPLH are the same as $t_{p d}$.
H. All parameters and waveforms are not applicable to all devices.

${ }^{(1)}$ The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but Tl does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.
${ }^{(2)}$ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS \& no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb -Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed $0.1 \%$ by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb -Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and
package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb -Free (RoHS compatible) as defined above.
Green ( RoHS \& no $\mathbf{S b} / \mathrm{Br}$ ): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine ( Br ) and Antimony ( Sb ) based flame retardants ( Br or Sb do not exceed $0.1 \%$ by weight in homogeneous material)
${ }^{(3)}$ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Tl's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with Tl's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI .

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. Tl is not responsible or liable for such altered documentation.

Resale of Tl products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. Tl is not responsible or liable for any such statements.
