

## 0.5Ω, Quad SPDT Switches in UCSP/QFN

### General Description

The MAX4754/MAX4755/MAX4756 low on-resistance, analog switches operate from a single +1.8V to +5.5V supply. The MAX4754 and MAX4755 are dual, double-pole, double-throw (DPDT) switches. The MAX4756 is a quad, single-pole double-throw (SPDT) switch. They are configured to route either audio or data signals.

The MAX4754 has four 0.5Ω SPDT switches for audio-signal routing and two logic control inputs. The MAX4755 has four 0.5Ω SPDT switches (with two switches that have an additional 11Ω series resistor at the NC terminals). This allows users to drive an 8Ω speaker as a 32Ω load (ear speaker). The MAX4756 has four 0.5Ω SPDT switches controlled by one logic control input and an enable pin (EN) to disable the switches.

The MAX4754/MAX4755/MAX4756 are available in a space-saving 16-pin thin QFN and a tiny 16-bump 2mm x 2mm chip-scale package (UCSP™).

### Applications

Speaker-Headset Switching  
Audio-Signal Routing  
Cellular Phones  
PDAs/Hand-Held Devices  
Notebook Computers

UCSP is a trademark of Maxim Integrated Products, Inc.

### Features

- ◆ Data and Audio-Signal Routing
- ◆ Low RON (0.5Ω) Audio Switches
- ◆ 0.1Ω Channel-to-Channel Matching
- ◆ 0.2Ω On-Resistance Flatness
- ◆ 0.02% THD
- ◆ +1.8V to +5.5V Supply Range
- ◆ Rail-to-Rail Signal Handling
- ◆ 16-Bump UCSP (2mm x 2mm)

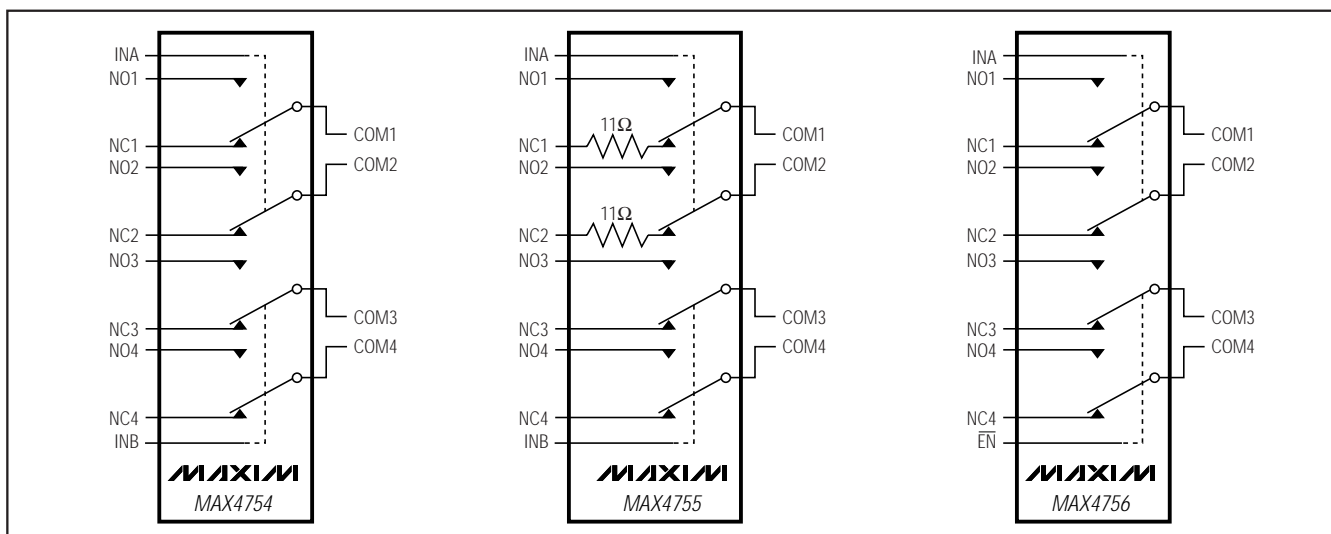

### Ordering Information

Bump Temperature (soldering)	
Infrared (15s)	+220°C
Vapor Phase (60s)	+215°C
Lead Temperature (soldering, 10s)	+300°C

**Note 1:** Signals on NO\_, NC\_, COM\_ exceeding V+ or GND are clamped by internal diodes. Limit forward-diode current to maximum current rating.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## ELECTRICAL CHARACTERISTICS

**Note 2:** The algebraic convention is used in this data sheet; the most negative value is shown in the minimum column.

**Note 3:** UCSP parts are 100% tested at +25°C and limits across the full temperature range are guaranteed by correlation and design. Thin QFN parts are 100% tested at +85°C and limits across the full temperature range are guaranteed by correlation and design.

**Note 4:** R<sub>ON</sub> and ΔR<sub>ON</sub> matching specifications are guaranteed by design.

**Note 5:** ΔR<sub>ON</sub> = R<sub>ON(MAX)</sub> - R<sub>ON(MIN)</sub>.

**Note 6:** Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured over the specified analog signal ranges.

**Note 7:** Guaranteed by design, not production tested.

**Note 8:** Off-Isolation = 20log<sub>10</sub> [V<sub>COM</sub> / (V<sub>NO</sub> or V<sub>NC</sub>)], V<sub>COM</sub> = output, V<sub>NO</sub> or V<sub>NC</sub> = input to off switch.

**Note 9:** Between any two switches.

MAX4754/MAX4755/MAX4756

## Typical Operating Circuit

## 0.5Ω, Quad SPDT Switches in UCSP/QFN

### Detailed Description

The MAX4754/MAX4755/MAX4756 low on-resistance analog switches operate from a single +1.8V to +5.5V supply. The devices are fully specified for nominal 3V applications.

The MAX4754 DPDT switch has two logic control inputs with each input controlling two SPDT switches. Each switch has a 0.5Ω on-resistance in the NO and NC terminals making it ideal for switching audio signals.

The MAX4755 DPDT switch also has four 0.5Ω SPDT switches with the switch pairs 1 and 2 adding an 11.5Ω series resistor to the NC terminal. This feature allows the user to drive an 8Ω speaker as a 32Ω load, allowing it to be used as an ear speaker. Two logic control inputs are used to control the four switches.

The MAX4756 has four 0.5Ω SPDT switches controlled by one logic control input (INA) and  $\overline{\text{EN}}$  input to disable the switches.

### Applications Information

#### Digital Control Inputs

The MAX4754/MAX4755/MAX4756 logic inputs accept up to +5.5V regardless of the supply voltage. For example, with a +3.3V supply IN<sub>1</sub> can be driven low to GND and high to +5.5V, which allows mixed logic levels in a system. Driving the control logic inputs rail-to-rail also minimizes power consumption. For a +3V supply voltage, the logic thresholds are 0.5V (low) and 1.4V (high).

For the MAX4756, drive  $\overline{\text{EN}}$  low to enable the COM<sub>1</sub>. When  $\overline{\text{EN}}$  is high, COM<sub>1</sub> is high impedance.

#### Analog Signal Levels

Analog signal inputs over the full voltage range (0V to V<sub>+</sub>) are passed through the switch with minimal change in on-resistance (see the *Typical Operating Characteristics*). The switches are bidirectional so NO<sub>1</sub>, NC<sub>1</sub>, and COM<sub>1</sub> can be either inputs or outputs.

#### Power-Supply Bypassing

Power-supply bypassing improves noise margin and prevents switching noise from propagating from the V<sub>+</sub> supply to other components. A 0.1μF capacitor connected from V<sub>+</sub> to GND is adequate for most applications.

### UCSP Applications Information

For the latest application details on UCSP construction, dimensions, tape carrier information, printed circuit board techniques, bump-pad layout, and recommended reflow temperature profile, as well as the latest information on reliability testing results, go to the Maxim website at [www.maxim-ic.com/ucsp](http://www.maxim-ic.com/ucsp) for the Application Note: *UCSP—A Wafer-Level Chip-Scale Package*.

NOTES:

- DIMENSIONING & TOLERANCING CONFORM TO ASME Y14.5M-1994.
- ALL DIMENSIONS ARE IN MILLIMETERS, ANGLES ARE IN DEGREES.
- N IS THE TOTAL NUMBER OF TERMINALS.
- THE TERMINAL #1 IDENTIFIER AND TERMINAL NUMBERING CONVENTION SHALL CONFORM TO JEDEC 95-1 SFP-012. DETAILS OF TERMINAL #1 IDENTIFIER ARE OPTIONAL, BUT MUST BE LOCATED WITHIN THE ZONE INDICATED. THE TERMINAL #1 IDENTIFIER MAY BE EITHER A MOLD OR MARKED FEATURE.
- DIMENSION b APPLIES TO METALLIZED TERMINAL AND IS MEASURED BETWEEN 0.25 mm AND 0.30 mm FROM TERMINAL TIP.
- ND AND NE REFER TO THE NUMBER OF TERMINALS ON EACH D AND E SIDE RESPECTIVELY.
- DEPOPULATION IS POSSIBLE IN A SYMMETRICAL FASHION.
- COPLANARITY APPLIES TO THE EXPOSED HEAT SINK SLUG AS WELL AS THE TERMINALS.
- DRAWING CONFORMS TO JEDEC M2220, EXCEPT FOR T2444-1, T2444-3 AND T2444-4.
