BA = Bank Address

NOP = No Operation command

CA = Column Address

AP = Auto Precharge

Notes:

1. All inputs will be enabled when CKE is set high for at least 1 cycle prior to the inputs.
2. Illegal to bank in specified state, but may be legal in some cases depending on the state of bank selection.
3. Satisfy the timing of t_{CCD} and t_{WR} to prevent bus contention.
4. NOP to bank precharging or in idle state. Precharges activated bank by BA or A10.
5. Illegal if any bank is not idle.
