

## STN83003

High voltage fast-switching  
NPN power transistor

### General features

- Medium voltage capability
- Low spread of dynamic parameters
- Minimum lot-to-lot spread for reliable operation
- Very high switching speed
- SOT-223 plastic package for surface mounting circuits
- Tape and reel packing

### Applications

- Electronics ballasts for fluorescent lighting
- Switch mode power supplies

### Description

The device is manufactured using high voltage Multi-Epitaxial Planar technology for high switching speeds and medium voltage capability. It uses a Cellular Emitter structure with planar edge termination to enhance switching speeds while maintaining the wide RBSOA.

The STN83003 is expressly designed for a new solution to be used in compact fluorescent lamps, where it is coupled with the STN93003, its complementary PNP transistor.
