

# NE592, SE592 DIFFERENTIAL VIDEO AMPLIFIERS

D2667, FEBRUARY 1984—REVISED NOVEMBER 1991

- 90-MHz Bandwidth
- Adjustable Gain to 400
- No Frequency Compensation Required
- Adjustable Pass Band
- Designed to Be Interchangeable With Signetics SE592 and NE592

DEVICE TYPE	TEMPERATURE RANGE	A <sub>VD</sub> RANGE (GAIN OPTION 1)
NE592	0°C to 70°C	250–600
SE592	–55°C to 125°C	300–500

## description

These devices are monolithic two-stage video amplifiers with differential inputs and differential outputs.

Internal series-shunt feedback provides wide bandwidth, low phase distortion, and excellent gain stability. Emitter-follower outputs enable the device to drive capacitive loads, and all stages are current-source biased to obtain high common-mode and supply-voltage rejection ratios.

Fixed differential amplification of nominally 100 or 400 may be selected without external components, or amplification may be adjusted from 0 to 400 by the use of a single external resistor connected between the gain-adjustment pins 1A and 1B. External frequency-compensating components are required for any gain option.

The devices are particularly useful in magnetic-tape or disk-file systems using phase or NRZ encoding and in high-speed thin-film or plated-wire memories. Other applications include general-purpose video and pulse amplifiers where wide bandwidth, low phase shift, and excellent gain stability are required.

The NE592 is characterized for operation from 0°C to 70°C. The SE592 is characterized for operation over the full military temperature range of –55°C to 125°C.

# NE592, SE592 DIFFERENTIAL VIDEO AMPLIFIERS

schematic

All resistor values shown are in ohms and nominal.  
In NE592 or SE592, R1 = 500  $\Omega$ , R2 = 500  $\Omega$ .

## absolute maximum ratings over operating free-air temperature (unless otherwise noted)

Supply voltage, $V_{CC+}$ (see Note 1)	8 V
Supply voltage, $V_{CC-}$ (see Note 1)	-8 V
Differential input voltage	$\pm 5$ V
Common-mode input voltage	$\pm 6$ V
Output current	10 mA
Continuous total power dissipation	See Dissipation Rating Table
Operating free-air temperature range: NE592	0°C to 70°C
SE592	-55°C to 125°C
Storage temperature range	-65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds: D or N package	260°C
Lead temperature 1,6 mm (1/16 inch) from case for 60 seconds: J package	300°C

NOTE 1: All voltage values except differential input voltages are with respect to the midpoint between  $V_{CC+}$  and  $V_{CC-}$ .

DISSIPATION RATING TABLE

PACKAGE	$T_A = 25^\circ\text{C}$ POWER RATING	DERATING FACTOR	DERATE ABOVE $T_A$	$T_A = 70^\circ\text{C}$ POWER RATING	$T_A = 125^\circ\text{C}$ POWER RATING
D	500 mW	N/A	N/A	500 mW	
J	500 mW	11 mW/°C	105°C	500 mW	275 mW
N	500 mW	N/A	N/A	500 mW
