## Description

The CMM6003-SC is a high dynamic range amplifier designed for applications operating within the 50 MHz to 870 MHz frequency range. It is an ideal solution for transmit and receive functions where high linearity is required.

The amplifier has the flexibility of being optimized for a number of wireless applications. The combination of gain flatness, bandwidth, low NF and high IP3 at the same bias point make it an ideal transmit or receive solution when used in intermediate frequency applications.

The CMM6003-SC is packaged in a low-cost space efficient, surface mount SOT-89 package which provides excellent electrical stability and low thermal resistance. All devices are 100% RF (at 800 MHz) and DC tested.

## Absolute Maximum Ratings

Supply Voltage	+6.0 V
RF Input Power*	+10 dBm
Storage Temperature	-55°C to 150°C
Junction Temperature	150°C
Operating Temperature	-40°C to +85°C
Thermal Resistance	59° C/W

Operation of this device above any of these parameters may cause damage.  
\*Operation with more than 10 dBm of input power may cause 2 dB degradation in OIP3 performance.
