Product Description:

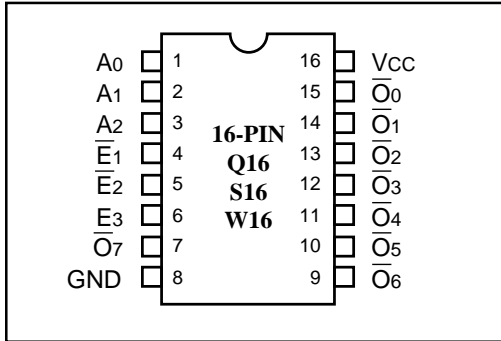

Pericom Semiconductor's PI74FCT series of logic circuits are produced in the Company's advanced 0.8 micron CMOS technology, achieving industry leading speed grades.

These high-speed decoders accept three binary weighted inputs (A0, A1, A2) and gives eight mutually exclusive active LOW outputs (O0-O7: PI74FCT138T) or active HIGH outputs (O0-O7: PI74FCT238T) when enabled. These devices contain three enable inputs, two active LOW ($\bar{E}1, \bar{E}2$) and one active HIGH (E3). On the PI74FCT138T all outputs will be HIGH and on the PI74FCT238T all outputs will be LOW, except when $\bar{E}1$ and $\bar{E}2$ are LOW and E3 is HIGH.
