Description

The Bel xRBA-06E2Ax modules are a series of non-isolated dc/dc converters that can deliver up to 6 A of output current with full load efficiency of 92% at 5.0 Vdc output. These modules provide precisely regulated voltage programmable via external resistor from 0.75 Vdc to 5.0 Vdc over a wide range of input voltage. These modules have a sequencing feature that enables designers to implement various types of output voltage sequencing when powering multiple voltages on a board. Their open-frame construction and small footprint enable designers to develop cost and space-efficient solutions. Standard features include remote On/Off, programmable output voltage and over current protection.

Part Selection

Output Voltage	Input Voltage	Max. Output Current	Max. Output Power	Typical Efficiency	Model Number Surface Mount	Model Number Vertical Mount
5.0 V	7.0 V - 14 V	6 A	30.0 W	92%	SRBA-06E2Ax	VRBA-06E2Ax
0.75 V - 3.3 V ¹	4.5 V - 14 V	6 A	19.8 W	88%	SRBA-06E2Ax	VRBA-06E2Ax

- Notes:**
1. These modules use a buck topology, so the output voltages must be 0.5 V less than the input voltage.
 2. Use "0" to replace "x" for remote on/off active high logic and use "L" for active low logic. Add "G" suffix at the end of the model numbers to indicate Tray Packaging.
 3. All part numbers above indicate RoHS 6. Change the second letter "R" to "7" for RoHS 5 part numbers.
