Frequency Adjust OptionsA±3 ppm minimum via internal mechanical adjust
positive slope.B±3 ppm minimum via external voltage, 0 to +5 VdcFNo Frequency Adjust. Standard option for ±1 ppm
and ±4.6 ppm for 10 years units. However, this

option is available with all Stability options. No user adjustment is needed. Unit is Plug-N-Play.

Note: This option is ideal for high volume applications where minimal set-up and testing is desired.
