

TC9097F

TIME-COMPRESSION LSI FOR WIDE TV

The TC9097F is a time-compressing LSI for displaying a decoded picture of a 4 : 3 aspect ratio NTSC/PAL broadcast on a 16 : 9 aspect ratio TV screen.

FEATURES

- Has 3 mode : mode for 1/2 and 3/4 time-compression of picture only of the luma and chroma signals, and no-compression mode
- When using 1/2 and 3/4 compression processing it performs side-panel addition
- Internal A/D's have resolution of 8bits for Y Input, I Input and Q Input
- Internal D/A's have resolution of 8bits for Y Output I Output and Q Output
- Build in 1368fH VCO
- I²C bus control
- 5V single power supply

Weight : 1.6g (Typ.)

BLOCK DIAGRAM

QFP80-P-1420-0.80A

Technical drawing of a rectangular component, likely a printed circuit board (PCB) or a similar electronic component, showing dimensions and tolerances.

Top View Dimensions:

- Overall width: 24.8 ± 0.3
- Overall height: 18.8 ± 0.3
- Inner width: 20.0 ± 0.2
- Inner height: 14.0 ± 0.2
- Left side features: 64, 41, 65, 80, 1.0TYP
- Right side features: 40, 25, 24
- Bottom side features: 0.8TYP, 0.8, 0.35 $\pm$ 0.1, 0.16 (M)

Side View Dimensions:

- Overall height: 3.05 MAX
- Inner height: 2.7 ± 0.2
- Bottom thickness: 0.2 ± 0.1

Detail View Dimensions:

- Width: 1.2 ± 0.2
- Height: $0.15^{+0.1}_{-0.05}$

RESTRICTIONS ON PRODUCT USE

000707EBA

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
